

# **Curriculum vitae**

Name: **Hamed Mirjalali**

**H index: 22**

Birth date: **20 March 1984**

Marriage: **Married.**

**Ph.D of Medical Parasitology**

**Address:** Shahid Beheshti University of Medical Sciences, Velenjak, Chamran highway, Tehran, Iran

**Phone Number:** +989155728602

**Email:** [hamedmirjalali@sbmu.ac.ir](mailto:hamedmirjalali@sbmu.ac.ir), [hamed\\_mirjalali@hotmail.com](mailto:hamed_mirjalali@hotmail.com)

## **Educations**

**BSc degree:** Veterinary Medicine, Semnan University, Semnan, Iran

**MSc degree:** Medical Parasitology, Tehran University of Medical Sciences, Tehran, Iran.

**Thesis subject:** Isolation and Molecular characterization of *Trichinella* species from road-killed animals

**Year:** 2010

**PhD degree:** Medical Parasitology, Tehran University of Medical Sciences, Tehran, Iran.

**Thesis subject:** Molecular detection and Identification of human-infecting microsporidia among immunocompetent and immunocompromised subjects in Iran

**Year:** 2014

## Focused area

Gastrointestinal Parasitic diseases; Medical and veterinary parasitology; Environmental microbiology; Foodborne and Waterborne Microbiology; Host-parasite interaction; Diagnostic techniques; Immuno-Parasitology; Molecular analysis and networking.

## Skills

1. Multidisciplinary team supervising.
2. Scientific proposal and grant writing.
3. Scientific writing.
4. Wet lab and molecular lab specialist for Foodborne and Waterborne Diseases.
5. Environmental, water, and wastewater sample processing.
6. Advanced experiences for designing and conducting molecular tests (conventional PCR, Real-time PCR [absolute quantification, relative quantification, HRM, melt curve analysis, and etc], LAMP PCR, ...]).
7. Nano-Biosensor designing for detection of microsporidia.
8. Starting works on Lab-on-a chip detection tests and biosensors.
9. Working on cell culture, western blotting, Small interfering RNAs (siRNA and micro RNAs), drug-cell interactions, and host-parasite interactions.
10. Statistical, phylogenetic, and population genetic software (MEGA, PopArt, DnaSP, Graph Pad Prism, and SPSS).
11. Animal lab studies.

## Experience

1. **Assistant Professor** at Foodborne and Waterborne Diseases Research Center, Research Institute for Gastroenterology and Liver Diseases, Shahid Beheshti University of Medical Sciences from 2014 until now.

## **2. Supervising of Ph.D and MSc students**

At least 10 Ph.D and more than 20 MSc theses in the fields of Gastroenterology, Medical Parasitology, Veterinary Parasitology, and Foodborne/Waterborne parasites.

- 3.** Technical scientist for Dept. of Molecular disorders and Infectious Diseases at Labra veterinary laboratory from September 2020 until now.
- 4.** Member of Quality Assurance Inspector team of ISO 15189 for Medical Laboratories from May 2022.
- 5.** Associate editor for BMC Infectious Diseases (Sep 2018 until now), Frontiers publications (2019 until now), and handling editor of Scientific Reports.
- 6.** Reviewer of Lancet Infectious Diseases, PLoS, Frontiers publications, Food Control and several other journals.

## **Projects**

### **A. Principal investigator of finished projects:**

1. Detection and identification of intestinal Microsporidia spp. in biopsy specimens of patients with Inflammatory Bowel Disease (Crohns' disease – Ulcerative colitis).
2. Determining and comparing the expression patterns of different microRNA signatures in gastric AGS cell line co-infected with Helicobacter pylori strains carrying intact and/or partial cagPAI locus
3. Study of the effects of extracellular vesicles (EVs) derived from *Fasciola hepatica* on the level of anti-inflammatory biomarkers in THP-1 cell line
4. Study of the epidemiology of *Trichostrongylus* spp., and its species and types in endemic regions of Guilan province using PCR/sequencing of COX gene.
5. Investigating the effect of recombinant *Toxoplasma* profilin via NLRP3-mediated signaling pathway in induction of pro-inflammatory response in a trans well co-culture model
6. Evaluation of *Toxoplasma* Immunization capability against *Mycobacterium tuberculosis* and evaluation of its effect via P2X7R pathway in THP1 Cell line

7. Study the effects of combination between Azathioprine and *Toxoplasma gondii* on THP-1 cell line via mTORC1 and autophagy signaling
8. study of the effects of *Blastocystis* ST3 on expression levels of MicroRNAs involved in tight junctions.
9. Validation of molecular methods for detection of waterborne pathogens and indicator microorganisms for fecal contamination of water.
10. Isolation, molecular identification and genotyping of microsporidia from wastewater and downstream farmland irrigated with wastewater in south of Tehran.
11. A Real-time PCR based multigene panel for detection of food-borne pathogens in vegetable samples.
12. Identification of fungal and viral endosymbionts of free living amoeba from hospital wastewaters.
13. Study of parasitic contamination and their molecular characteristics of wastewater treatment facilities and drinking water resources of oil refinery system, south of Tehran.
14. Study of the common parasite protozoa contamination in vegetables sample real time PCR in Tehran
15. Prevalence study and subtypes investigation of *Blastocystis* spp., in IBS/IBD patients
16. Amplification and characterization of protease genes of *Blastocystis* sp. subtypes, isolated from diarrheic and non-diarrheic patients.
17. Study on protease activity of *Blastocystis* sp subtypes and its effects on inflammatory biomarkers on cell culture
18. Application and evaluation of real-time PCR using High Resolution Melting (HRM) curve analysis for subtyping of *Blastocystis*.
19. Genotyping of *Fasciola* spp., isolated from human and animals with clos-contact to human and characterization of the protease (Cathepsin B-like) gene of the parasite.
20. Characterization and study of the Metronidazole resistant gene (nim) among *Blastocystis* isolated from the clinical samples.
21. Investigation of the correlation between dietary patterns and *Blastocystis* sp., infection and subtypes in human subjects.
22. Human-infecting microsporidia: Study of distribution and diversity in healthy and diarrheic humans with or without immune disorders
23. Study of the toxicity effects of *Mentha pulegium* and *Rubus idaeus* extract against *Toxoplasma gondii* "in vitro"

24. Designing, establishment and evaluation of a panel real-time PCR for simultaneous detection of Enteropathogenic parasites in stool samples of human, and domesticated animal

**B. Principal investigator of ongoing projects:**

1. Determination of *Giardia* assemblages using multigene typing in human subjects.
2. Designing and fabrication of label-free biosensor for the detection of Microsporidia.
3. Study of the prevalence of foodborne parasites (*Toxoplasma gondii* and *Sarcocystis* spp) in meat products supermarkets in Tehran, Iran.
4. Designing, fabrication, and evaluation of Multiplex Microfluidic LAMP (M $\mu$  LAMP) PCR for simultaneous detection of *Giardia lamblia*, *Cryptosporidium* spp. and microsporidia.
5. Study of the effects of *Blastocystis* on the changes of bacterial community of the gastrointestinal tract in people with irritable bowel syndrome
6. Study of the anti-cancer effects of extracellular vesicles derived from Hydatid cysts
